

Dear Parents/Families:

Now that we have received state public health guidance to close schools for an extended period (**March 30 – April 30 2020**), we have developed distance-learning plan to minimize the disruption to learning by making out-of-school days educationally productive and engaging for all of our students.

The following distance learning plans provide guidance to you as parents and guardians to assist your children in their daily online learning participation.

Thank you for supporting your children in their learning.
